Subject: RE: Nancy Stade of FDA has accepted the Biocides Panel invitation to attend the meeting on May 14

Has, because of the potential 158W issues relating to the FDA/EPA jurisdictional discussion I have asked Phil Ross from our OGC to attend to assist EPA. Will there be legal representation for ACC there? If ACC does not plan to have legal representation at the meeting, are you OK with Phil attending?

Subject: Nancy Stade of FDA has accepted the Biocides Panel invitation to attend the meeting on May 14

Susan and Jennifer: Nancy Stade, the FDA Deputy Center Director for Policy, will be at the Biocides Panel meeting on May 14 from 3-4. This will be a good opportunity for EPA, FDA and registrants to discuss issues related to the use of antimicrobials in medical devices. You had indicated interest in addressing this issue at the last Panel meeting and opening up dialogues to clarify policies and procedures will be a good start. So please alert other AD/OPP staff as feel appropriate.
